How to select your on-line course of study?

Courses at the COBie Academy have been designed to support buildingSMART international's official COBie Educational Curriculum and Learning Objectives (https://cobie.buildingsmart.org/resources/learning/). To select the right course or courses for you, identify the row containing the tasks you typically perform shown in the first column. Based on the type of tasks you perform, the best suited course can be identified in the columns to the right.

What type of tasks do you perform?	Which COBie Course(s) are best for you?		
	COBie Fundamentals	COBie Technical Manager Series	COBie ScoreCard™
BIM Production Project Management	X (1,2)		
BIM Management COBie Quality Control Information Integration		X (3)	
Corporate Management Business Consultation			X

NOTES:
(1)   Production of COBie data from BIM software requires the COBie Fundamentals course and a detailed knowledge of the operation of that software. A primary resource for most BIM Users will be the book "Delivering COBie Using Autodesk Revit."
(2)   The COBie Academy is currently developing a course based on the book "Delivering COBie Using Autodesk Revit." If you are interested in this course, please contact us and we will let you know when registration becomes open.
(3)   The COBie Technical Manager Course Series has been identified as a bSI Registered Training Provider for those seeking to sit for the bSI COBie Certified Professional examination.
